Application/Control Number: 09/835,121 Page 2

Art Unit: 1651

## **DETAILED ACTION**

1. Claims 1-23 are currently pending. Please take notice of the election of species requirement beginning on page 3. To be fully responsive, applicant must fulfill this requirement.

## Election/Restrictions

- 2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - Claims 1-7, drawn to a method of treating or preventing a malignancy or hypercholesterolemia, classified in class 424, subclass 736.
  - II. Claim 8, drawn to a method of nutritionally supplementing a foodstuff, classified in class 424, subclass 736.
  - III. Claim 9, drawn to a dietary supplement, classified in class 424, subclass 736.
  - IV. Claim 10, drawn to a method of supplementing a pharmaceutical, classified in class 424, subclass 736.
  - V. Claims 11 and 14-23, drawn to a compound isolated from cranberry, classified in class 424, subclass 732.
  - VI. Claim 12, drawn to a compound isolated from cranberry, classified in class 424, subclass 732.
  - VII. Claim 13, drawn to a composition isolated from cranberry, classified in class 424, subclass 732.

The inventions are distinct, each from the other because of the following reasons:

3. Invention III, V, VI, and VII are related to inventions I, II, IV as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown:

Application/Control Number: 09/835,121 Page 3

Art Unit: 1651

(1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product can be used in a different process, such as the use of anthocyanidins as an antioxidants.

- 4. Inventions I, II, and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions. The function of invention I is to treat disease states. The function of invention II is to improve the nutritional properties of a food. The function of invention IV is to improve the beneficial properties of a pharmaceutical. These functions are distinct.
- 5. Inventions III, V, VI, and VII are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different effects. Each invention is drawn to a different compound. These different compounds would have different effects when ingested by a patient.

Because these inventions are distinct for the reasons given above and the search required for one group is not required for the other groups, restriction for examination purposes as indicated is proper.

- 6. This application contains claims directed to the following patentably distinct species of the claimed invention:
  - A) malignancy or hypercholesterolemia from claim 1;

Application/Control Number: 09/835,121

Art Unit: 1651

- B) specific composition from those in claims 1, 8, 9, or 10;
- C) additional ingredients from claim 5;
- D) specific compound from claim 11;
- E) specific compound from claim 12;
- F) if phenolic acid is elected for species D, applicant must elect a specific phenolic acid from those in claim 14;
- G) if flavanoid is elected for species D, applicant must elect a specific flavanoid from those in claims 15-19.

Applicant must elect a specific species for each of the appropriate categories that correspond in claim number to the elected group. For example, if group II is elected, applicant must elect a specific species for B. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, all claims are generic.

7. An example of a proper election is as follows:

Group I: species A): hypercholesterolemia; species B): citrus fruit peel; species C): fats.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after

Art Unit: 1651

the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Susan Coe whose telephone number is (703) 306-5823. The examiner can normally be reached on Monday to Thursday from 8:00 to 5:30 and on alternating Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Wityshyn, can be reached on (703) 308-4743. The fax phone number for the organization where this application or proceeding is assigned is (703) 305-3014.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0196.
